

MRc Credit 4.2

Materials and Resources

1 LEED potential point (in addition to MRc4.1)

Recycled content: 15%

Intent

Increase demand for building products that incorporate recycled content materials, therefore reducing impacts resulting from extraction and processing of new virgin materials and by-passing energy and green house gas-intensive industrial and manufacturing processes.

Object

Certification letter to certify that the content of recycled materials used in PROFIX products is in compliance with the LEED prerequisites established for the Materials and Resources category.

Requirements

Use materials with recycled content such that the sum of post-consumer recycled content plus 1/2 of the pre-consumer content constitutes at least 15% (based on cost) of the total value of materials in the project. The recycled content value of a material assembly shall be determined by weight. The recycled fraction of the assembly is then multiplied by the cost of the assembly to determine the recycled content value.

La Margna inc., as the exclusive manufacturer of PROFIX tile and stone installation products, is committed to offering you superior quality products that meet or surpass industry standards which are established by the *Terrazzo, Tile & Marble Association of Canada (TTMAC)* and by the *Tile Council of North America (TCNA)*.

In my capacity as Director of Research and Development for La Margna Inc., I declare and certify that all of the products listed in the appendix titled "PROFIX products relating to the prerequisite for MRc Credit 4.2 Materials and Resources" comply with the recycled materials requirements.
